

Store Locator Plugin Installation Guide

1. After purchasing plugin, you will be directed to App management page. Go to **Install Connector** tab; download Store locator connector, which is a zip file.
2. It is required to enable cache in the administration panel of your site. Go to System/Cache Management. Choose all caches and take action “Enable” then submit.
3. Use FTP client (such as Filezilla, WinSCP, cuteFtp) to upload or copy all folders in the zip package to your Magento site root folder. This will not overwrite any existing files, just add new files to the folder structure.
4. After uploading is done, log in your Magento administration panel to refresh cache. Go to System/Cache Management. Select all caches and take action “Refresh” then submit.
5. Navigate to System/Configuration, if you can see the extension tab, it is installed properly.
6. Now if you get Access denied error when click on the extension tab, you need to log out admin panel and log in again.
7. Open the app and test your work.
